Subject: RE: RCID Approval for Key Cores and Keys for - Flamingo Crossing Pedestrian Bridges

Good morning [REDACTED]
Unfortunately the hardware will not be compatible with anything Disney or RCID use. Also we will not be able to duplicate the key that is currently being used. So I will see if we can find out what we did with the Disney Springs project. I'm thinking that our RCID contact for that project was either [REDACTED] or [REDACTED] that may recall what needed to be done, but I know that [REDACTED] has retired so hopefully [REDACTED] will know. Please let us know how you would like to proceed. We can order the correct hardware and cores for this and I will check if we have enough hardware in stock to front this if needed because I'm sure you will want to have this completed soon to get the TCO and some of the doors don't have the cores in them.

Mike

Hello Mike,

We appreciate your help. The contractor was directed to provide Medeco 6 pin 32 series cores. Please let me know what address you would like us to bring a key to for copies to be made. As far as final keying, we can loop in our facilities team later on in the event that these are not able to be 5AA1 keys.

Thank you,

[REDACTED]

Good morning [REDACTED]
We will need to go on site to survey everything to see if it is compatible with the Disney key system. With the ones at Disney Springs the incorrect hardware was installed and had to be ordered and replaced. Did the contractor provide the Medeco cores or a cost center to charge? Also something that will need to be addressed is the keying. Our new keying is laid out and broken down into regions and that area does not fall under the 5AA1 keying so we will look at what will need to be address on this. Let us first start by checking the current hardware and we will go from there. We can make copies of the current key as well. We will need a copy as well for when we change out the cores to the final keying. So whenever you can bring it by would be great. Please let us know if you have any questions.
Thank you,

Mike

Subject: RE: RCID Approval for Key Cores and Keys for - Flamingo Crossing Pedestrian Bridges

Hello Frank and Mike,

As [REDACTED] mentioned, we are wrapping up the construction of two new pedestrian bridges in the Flamingo Crossings area. The first bridge is located at 2251 Western Way and the second bridge is located at 13401 Hartzog Rd. Each bridge will need a (8) 5AA1 cores, for a total of (16) 5AA1 cores.

At this time, we are only in need of our temporary cores to be replaced within the bridge at 13401 Hartzog Rd. We kindly ask that you provide 4 permanent interior door cores (Serial 5AA1) and 4 exterior door cores (Serial 5AA1) and 6 keys for our Faculties team. Additionally, would it be possible for 4 copies to be made of our current temporary key (we can provide it on site) to utilize for knox box and permitting purposes?

We will likely make a second request for our other bridge sometime late next week. Please let me know if you can accommodate this request, or if any additional information is needed.

Thank you in advance!

Frank and Mike,

I would like to introduce you to [Redacted]. As the RCID construction team moves to change construction locks at the RCID pedestrian bridges at Flamingo crossing, [Redacted] is authorized to work with you to get new regional cores and keys for that location for RCID. [Redacted] will be reaching out to you for assistance.
